

EarEEG
on-ear device that
measure your attention

How much attention do you have?

OUR APP KNOWS IT!

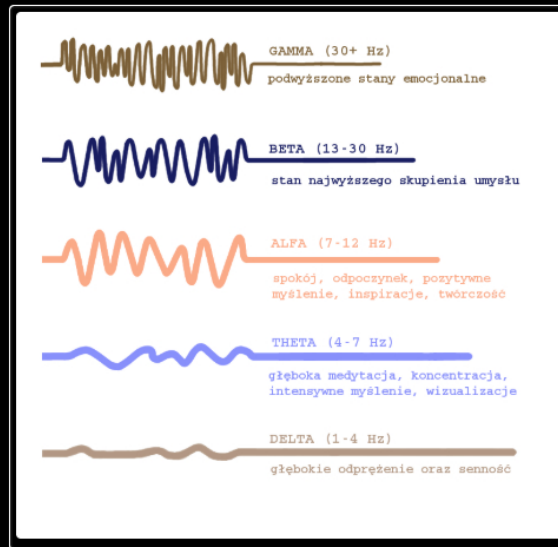

Depends on its
level, our
application knows
what you need to
do

Hardware? Already in progress.

Supported by a grant from the
University of Warsaw Innovation Lab.

Own data
= real insights

**But for now we borrowed
some data**

Source: [Attended speaker paradigm \(cEEGrid data\) - OpenNeuro](#)

And here we are where
**neuroscience meets
high-performance
code**

**Not just tracking focus
- hacking it!**
